  - Much More

Cat# PCA1

Safely Holds Material

**The pro Cut quickly attaches to a reciprocating saw to make cutting conduit and other material Quick, Safe, and Easy. No Vice Needed!**

### Speed

Ergonomically designed to increase speed, maintain consistent cutting and typically increases blade life.

### By Pass/Overhead Cutting

The pro Cut makes by pass and overhead cutting quick and easy and allows for small fit ins.

### Bench/Ground Cutting

The patented spring loaded jaws allow for cutting conduit on a workbench or full lengths of conduit right on the ground.

### Size

The unique spring loaded jaws can accept up to 1 1/4" conduit

### Clean Cut/Minimal Burrs

The consistent pressure of the pro Cut gives a clean cut and minimizes burrs. Best results when using 24 TPI blades.

### Quickly Installed and Removed

The pro Cut is easily installed by removing the reciprocating saw shoe and inserting the pro Cut attachment in its place.

### Material

The pro Cut can cut a wide variety of material: Conduit, Copper, BX, PVC, Wire, Threaded Rod, Liquid Tight, etc. Cuts all shapes and sizes.

Select the pro Cut attachment for reciprocating saw  
(reciprocating saw not included)
